About The Project

THE CLIENT

Mine site in Pilbara, Western Australia

THE ASK

This mining client was looking for a temporary haul-truck maintenance facility and selected Sprung structures as the product of choice due in part to the relocatable clear-span design, which really appealed to the design team. A first-hand visit to a 'salt storage' structure near Las Vegas really helped the client confirm the design, and quality of Sprung over other options.

HOW SPRUNG DELIVERED

Sprung shipped on schedule and the structure was erected in the desired time frame, in spite of the harsh conditions in Western Australia. Well-liked by the client's staff, the structure provides ample natural light thanks to the translucent daylight panels in its peak. Sprung's in-house design team also created six large entry points on the side of the structure to maximize logistics and space.

Though the building is meant to serve as a temporary workshop facility, its exterior Dupont Tedlar membrane will see the client through 25-plus years and can be relocated and reconfigured as required.

Sprung structures are the solution of choice for anyone in the mining industry who needs a rapidly deployable engineered structure that can be used over and over again for a wide variety of applications.

THE SPECS

100' wide x 357' long (30m x 109m) Warehouse

100' wide x 400' long (30m x 122m) Workshop

▶ SPRUNG CARES

Our teams work in some of the most vulnerable environments and harshest conditions. At Sprung, we are deeply committed to positively impacting the communities we serve, and applying our innovative ideas to help solve complex problems.

▶ UNMATCHED REPUTATION

Invest in the world's most reliable, versatile and technically advanced structures; Sprung has erected 12,000 structures in more than 100 countries.

ENGINEERED FOR EXTREME CLIMATES

Sprung structures are engineered to withstand extreme weather conditions.

▶ IMMEDIATE DELIVERY FROM INVENTORY

Complete projects in a much shorter time frame than conventional construction.

▶ CUSTOMIZABLE

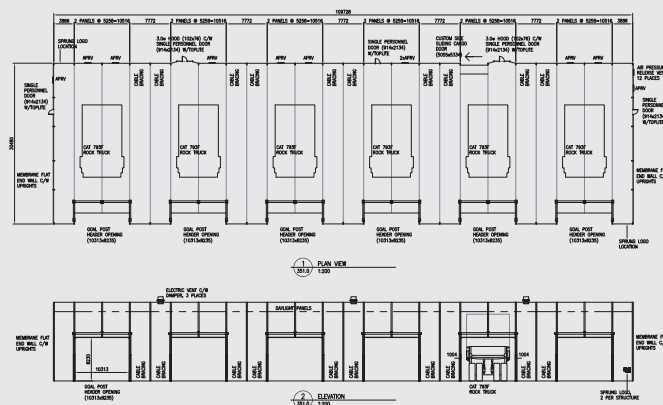

Customizations include performance insulation packages for superior indoor climate control, peak integrated daylight panels, doors and entryways for every application, and countless accessories.

▶ LIMITED FOUNDATION REQUIREMENTS

Save on foundation costs where appropriate soil conditions exist. Concrete foundations are not required for Sprung structures up to 160 ft. in width, saving time and cost for installation.

► **COST-EFFECTIVE, COMPACT SHIPPING**

Enjoy the convenience and cost savings of shipping up to 15,000 sq. ft. in a single, standard ISO container or flatbed truck.

About Sprung

Sprung Structures provides rapid-response buildings to a wide range of leading businesses and organizations including global armed forces, the natural resources industry, the manufacturing, commercial gaming and education sectors, disaster recovery, healthcare and aviation, as well as to the sports and recreation industry. Our patented tensioned membrane technology outperforms other building alternatives with a faster, better build.

Sprung has designed and patented tensioned membrane technology that outperforms other building alternatives and offers a faster, better build.

You can trust us to design and manufacture your facility with speed and quality that will exceed your expectations. Our clients demand it, our history proves it. In business since 1887, Sprung has completed over 12,000 structures in more than 100 countries.
