Flexible, free-span spaces can be expanded and repurposed for evolving needs.

[www.sprung.com](http://www.sprung.com)

- Classrooms
- Lecture halls
- Gymnasiums and assembly halls
- Campus retail
- Food service areas
- Staff areas
- Administration and offices
- Modular flex space
- Training facilities
- Research facilities and laboratories
- Libraries and study areas

Change is constant, but one thing remains certain: students, staff and teachers need safe and supportive environments to learn, play and work.

As educational facilities adapt to new health and distancing protocols, they must also maintain the comfort and performance necessary to support diverse learning needs and goals. Sprung structures are an immediate, engineered building solution, designed for long-term flexibility.

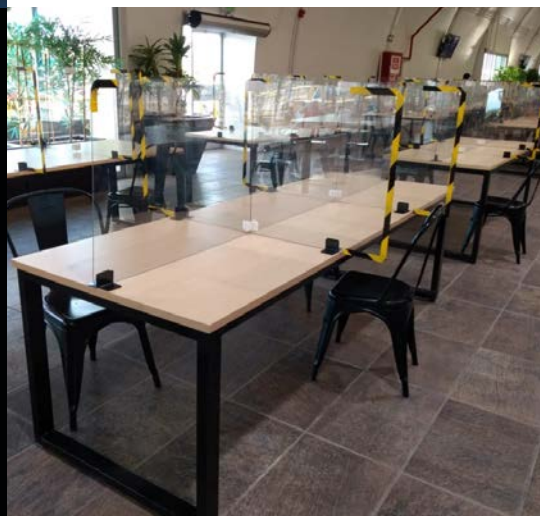

## FEATURES

- Immediate shipping
- Can be built within weeks
- Integrated daylight panels and glazing walls provide bright and airy spaces
- Superior interior climate control, with airtight building envelope and fiberglass insulation options that support lower operating costs
- Flexible financing options available, including lease or purchase

## About Sprung

Sprung is the global leader in manufactured tensioned membrane structures used around the world in industries including education, healthcare, sports and recreation, commercial and more. Designed for flexibility and engineered for permanence, Sprung's structures can be built within weeks, offer ample natural light, superior indoor climate control and are built to withstand harsh climates and severe weather events. In business and innovating since 1887, Sprung has completed over 13,000 structures throughout more than 100 countries.
