Engineered & Manufactured by Sprung Instant Structures

Red Dog Ice House
60' wide x 60' long

Eagle Ford shale area in Texas is a rapidly growing remote oil and gas development. With existing facilities in short supply, Sprung structures was called upon to supply an immediate building solution for a full service restaurant and bar located in Carrizo Springs Texas.

Sprung mobilized and supplied a 60' x 60' structure within 3 weeks. The structure includes natural daylight panels in the peak and large translucent garage doors in the flat ends. The clear span interior space provided by Sprung was ideal to incorporate a modular kitchen trailer as well as sports bar amenities typically found in conventional construction.

Los Angeles Dodgers Official Team Store
50' wide x 80' long

The Los Angeles Dodgers looked to elevate their retail presence at Dodger stadium and selected Sprung as the product of choice due in part to Sprung's superior engineering and upgraded aesthetics. Sprung Structures' superior tensioned membrane, glazing walls and interior daylight panels provide significant advantages over basic tent technology.

The Sprung structures are engineered to meet local building codes and standards for permanent buildings.

The new team store has been extremely successful and provided an immediate, aesthetically pleasing, affordable solution on a year-round basis.

University of Louisiana at Lafayette Book Store
60' wide x 105' long

The University of Louisiana at Lafayette was remodeling their student center and required a temporary bookstore. The university looked to several local colleges for a quick and reliable solution. Tulane University, who previously had a Sprung structure, recommended Sprung Structures based on the outstanding relationship and service they received.

The location for a temporary facility was a parking lot surrounded by an old bank, an independent bookstore, and a restaurant. A Sprung structure was designed to fit the location and was attached to the newly acquired independent bookstore and bank. Several issues such as working around a 150 year old tree, and timely construction schedules had to be taken into consideration.

The Structure incorporates a 2 story design with an interior service elevator.
