About The Project

THE CLIENT

A private academy for boys and girls in Calgary, Alberta, the Edge School was created to facilitate the development of academics and athletics in a way that does not sacrifice one over the other. The school's student-athletes learn in an environment where they feel safe to push themselves to new levels of personal excellence. The Edge provides high-level academic and athletic programs for Grades 4 through 12. edgeschool.com

THE ASK

Several years ago, the school expanded its campus property and was initially considering traditional construction for classrooms, two NHL-sized hockey rinks and a gymnasium. But when plans were developed, the estimated project costs exceeded the available budget by \$10 million. The architect and project manager then approached Sprung for an alternative proposal.

Sprung structures actually enhanced our performance opportunities, look absolutely incredible both inside and out, and were erected in a fraction of the time it would have taken had we made other choices."

– Brent R. M. Devost
Founder, President & CEO Edge School

HOW SPRUNG DELIVERED

Sprung provided two ice-rink structures (one 120' wide x 215' long, the other 120' wide x 229' long) and one gymnasium (120' wide x 215' long), which were shipped, erected, and completed with a net savings of \$7 million compared to the initial proposal. The decision to proceed with Sprung allowed the Edge School expansion to go forward on budget and on time. The two new ice arenas and gymnasium at the Edge School are now standout features of the school's campus facilities and continue to receive high praise from visiting teams, spectators and alumni.

THE SPECS

Ice Rinks - 120' wide x 215' long | 120' wide x 229' long
Gymnasium - 120' wide x 215' long
Dupont Tedlar architectural membrane
Fully insulated | R30 fiberglass blanket insulation

**We absolutely hit a home run

The Sprung Difference

► SPRUNG CARES

Our teams work in some of the most vulnerable environments and harshest conditions. At Sprung, we are deeply committed to positively impacting the communities we serve, and applying our innovative ideas to help solve complex problems.

► UNMATCHED REPUTATION

Invest in the world's most reliable, versatile and technically advanced structures; Sprung has erected 12,000 structures in more than 100 countries.

► ENGINEERED FOR EXTREME CLIMATES

Sprung structures are engineered to withstand extreme weather conditions.

► IMMEDIATE DELIVERY FROM INVENTORY

Complete projects in a much shorter time frame than conventional construction.

► CUSTOMIZABLE

Customizations include performance insulation packages for superior indoor climate control, peak integrated daylight panels, doors and entryways for every application, and countless accessories.

► LIMITED FOUNDATION REQUIREMENTS

Save on foundation costs where appropriate soil conditions exist. Concrete foundations are not required for Sprung structures up to 160 ft. in width, saving time and cost for installation.

► COST-EFFECTIVE, COMPACT SHIPPING

Enjoy the convenience and cost savings of shipping up to 15,000 sq. ft. in a single, standard ISO container or flatbed truck.

Sprung Knows Education

We have a proven track record with numerous structures around the world. See Sprung in action at:
