Engineered & Manufactured by Sprung Structures

Champions Run Golf Course
Omaha, Nebraska
60' wide x 90' long
30' round

When executives at Champions Run elected to replace the club's rental banquet tent with something more durable and permanent, they turned to Sprung for a building solution that would provide a pleasant, welcoming atmosphere for wedding receptions and other events. Sprung designed and delivered two fully insulated structures to serve as premium event space. Featuring attractive, clear-span interiors, as well as daylight panels and large windows for maximizing natural light, the all-season structures are engineered to withstand extreme wind loads and can accommodate up to 400 people comfortably.

"The new structures have already increased our revenue, and they're attracting many new events for the upcoming year."

Justin D. Cox, Director of Business Operations, Champions Run

TCP Harding Park
(formerly Harding Park Golf Club)
San Francisco, CA
40' wide x 120' long

While Harding Park was undergoing an extensive restoration in the early 2000s, it was determined that the storied course needed new storage facilities to house its golf carts and various other equipment. Sprung designed and delivered two structures, each featuring a spacious, clear-span interior to provide staff with plenty of flexibility in terms of use.

"Just wanted to let you know how pleased we are with our new cart storage facilities. The Sprung structures were erected quickly, and the clear-span space also gave us the flexibility to use the 40' x 120' structure as a welcoming center when we hosted the 2005 American Express Championship."

Rick Thall,
Project Manager,
City & County of San Francisco.

K-Club
County Kildare, Ireland
50' wide x 100' long

In advance of hosting the 2006 Ryder Cup, executives at the K Club identified the need for a temporary clubhouse that could be built quickly and cost-effectively. Sprung provided a fully insulated structure, complete with attractive entrance canopies and daylight panels to optimize natural light. The highly durable structure ended up serving as a clubhouse at the K Club until 2020, when it was adapted to become K Golf World, a state-of-the-art simulation facility featuring eight high-performance golf simulators, a full-service bar and kitchen.

"We were keen to avoid the traditional approaches of other golf clubs when providing temporary facilities. We found in Sprung Structures an effective and attractive alternative, which fulfilled all our needs and enabled us to provide the standards on which the K Club prides itself."

Paul Crowe, Director of Golf
Deputy Chief Executive
