Engineered & Manufactured by Sprung Structures

**Blackrock College**  
Dublin, Ireland  
80' wide x 185' long

One of the most prestigious schools in Ireland, Blackrock College is well-known for its athletics program. When school officials decided it was time to build a new, state-of-the-art sports facility on campus, they turned to Sprung for a solution that could be built quickly and affordably.

Sprung designed and delivered a fully insulated, 80' x 185' structure, which was erected in a fraction of the time of a conventional gymnasium, and at a much lower cost. Known as the Des Places Sports Hall, the innovative structure features a hard-wall Sprung Shield that runs down the interior and exterior walls to cover ducting while providing a protective rebound surface. The building also features a self-supporting canopy over the main entrance, as well as daylight panels in the peak, which optimize natural light in order to enhance the playing environment.

**Kainai Nation (Blood Tribe)**  
Southern Alberta  
130' wide x 290' long

Based primarily in Southern Alberta, the Kainai Nation (Blood Tribe) has more than 12,000 members, many of whom reside on the nation's primary reserve, which is the largest First Nations reserve in Canada.

In the face of rising health and wellness issues within its community, the Blood Tribe decided to build a multi-purpose recreation facility to inspire active living and connection.

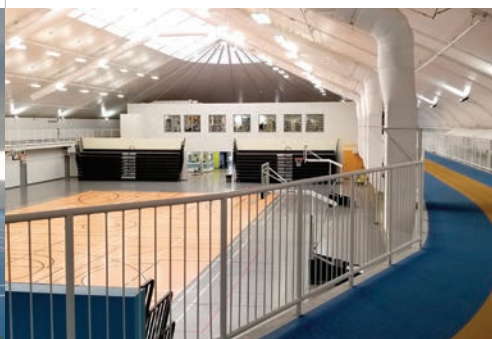

Within a few short months, a fully insulated Sprung structure was erected to accommodate a wide range of needs and applications. The structure features a 12,000-square-foot gymnasium, weight room, running track and change rooms, as well as administration space, centers for both Elders and youth, a nutrition center and an Indigenous library.

**Martensville Athletic Pavilion**  
Martensville, Saskatchewan,  
140' wide x 290' long

The City of Martensville needed a multi-use athletic facility that could serve both the community and the local high school. Cost and speed of construction were prime factors in determining the best option. Sprung provided a dynamic, fully insulated structure featuring 50,000 square feet of space for myriad activities. Known as the Martensville Athletic Pavilion, it includes three full-size basketball courts, an upper running track with four lanes, a fitness area with weights and cardio equipment, locker rooms, multi-purpose offices, a food concession and more.

The building was completed on time and on budget, and, thanks to the cost savings that came from not having to build a separate gymnasium at the high school, the City was able to add a 500-person theater to the facility, which is used by the school during the day and the community at night.
