Retail

Build Faster
Engineered & Manufactured by Sprung Instant Structures

**Taos Ski Lodge
Retail and Visitor's Center
70' wide x 150' long**

Taos Ski Valley needed a new welcome center, retail and rental shop during renovations (approximately 5 years) as the ski area was recently purchased by new owners and was receiving a major face lift to the tune of \$350 million. After considering other building alternatives, speed of construction and wow factor made Sprung the solution of choice for this ski lodge application.

This retail structure also includes the Visitor's Center, the Taos Ski Valley Chamber of Commerce offices, Ski and Boot Doctor, Seasonal Lockers, Andean Software and Rental Shop.

**Los Angeles Dodgers
Official Team Store
50' wide x 80' long**

The Los Angeles Dodgers wanted to elevate their retail presence at Dodger Stadium with an official team store. A Sprung structure was selected to house the shop, due in large part to its speed of construction, superior engineering and open, clear-span interior.

Sprung provided a 50' x 80' structure featuring double glass doors, glazing walls and daylight panels to make the most of natural light. With its bright, airy atmosphere, the store has become a popular stop for Dodgers fans.

An affordable solution for sports teams looking to increase retail sales on a year-round basis, Sprung structures are engineered to meet all local building codes and standards.

**University of Louisiana at Lafayette
Book Store
60' wide x 105' long**

The University of Louisiana at Lafayette (UL Lafayette) was remodeling its student center and needed a temporary bookstore. While searching for a fast and reliable solution, leaders at the school sought advice from other institutions. Tulane University, which had used a Sprung structure at one time, recommended Sprung based on the outstanding service the school received. UL Lafayette heeded Tulane's advice.

Sprung provided a 60' x 105' structure, which was designed to fit perfectly into its designated parking-lot site. Featuring a two-storey layout and an interior service elevator, the structure was attached to two of its neighboring buildings, allowing for ease of access among students and staff.
