Engineered & Manufactured by Sprung Structures

**Taos Ski Lodge, NM
Retail Facility
70' wide x 150' long**

As Taos Ski Valley was poised to undergo a five-year, \$350-million facelift, it was determined the resort needed an interim facility that could serve double-duty as a welcome center and retail/rental shop throughout the renovations.

After considering various building options, stakeholders chose to go with a Sprung structure, thanks to its cost-effectiveness, speed of construction and overall wow factor. Completed in just four months, the Sprung facility features R-25 fiberglass blanket insulation, two sets of automatic entry doors, attractive glazing walls for optimal natural light, and a unique Dupont Tedlar color combination (Desert Tan and Sky Blue) on its exterior.

**Arizona Snowbowl Ski Resort, AZ
Fremont Restaurant and Bar
50' wide x 90' long**

When Arizona Snowbowl needed a structure to house a mid-mountain dining facility in time for the ski season, executives turned to Sprung for a solution. Not only was speed of delivery critical, the new facility also had to be insulated, visually pleasing and capable of showcasing the resort's spectacular outdoor views—all while meeting strict USDA Forest Service building codes.

In just four weeks, the 4,500-square-foot structure was erected in a secluded ski-in, ski-out location. Known as Fremont Restaurant & Bar, the space can accommodate up to 200 people and includes a convenient connector (measuring 19'2") that leads to a kitchen facility. Large windows provide plenty of natural daylight and celebrate the stunning landscape, and the insulated structure supports everything needed for comfortable year-round dining and events.

**Blue Mountain Resort, PA
Day Lodge and Guest Services Complex
50' wide x 185' long
70' wide x 95' long
Two - 60' wide x 225' long**

With the increased popularity of snow tubing at Blue Mountain, the resort needed an immediate day lodge solution to accommodate tubers. Sprung designed and delivered a spacious, fully insulated structure that houses a full-service kitchen, a bar and a coffee shop, as well as spaces for staff and storage.

Five years after the addition of the day lodge, Blue Mountain decided to move several of its service areas to the base of the mountain. The resort team was so pleased with its original Sprung structure that they opted to attach three more (via connecting corridors) to their existing facilities. The complex is called Frontier Center and houses a rental shop, ticketing, a childcare center, a snack bar and a locker area.
